

K love is a regional broadcasted program in Northern California, and one which I listen to daily. They provide the only decent wholesome music left in the communication world today. Today where profanity is allowed in lyrics and where music is made and played to destroy minds, values, morals, and judgement, K-Love provides listeners with the relief from a Godless society.

Our family would not have any music to listen to if K-LOVE lost its FM translator. Simply put the commercials and programming on air now is not fit for families attempting to insulate young listeners from the crude statements made on radio that are now allowed by your offices. The public is still very much interested in learning how to cope with this world in a Godly manner, and K-LOVE provides edification, and clarification on issues we face as citizens in this great country where freedom of speech is often abused by radio personalities.

If K-Love were to lose its FM translator to LPFM, you would demoralize the world even further by displacing a program put on the air by divine power and substituting it with self-destructive man-made programming, which we all know is dangerous ground to tread. Left to our selves, we fail. Please let not K-LOVE fail our community. We need this program daily. Just as we need the air we breathe, it is that important. Thank you for your understanding.
